

What are the benefits of participating in this workshop?

- To preview a typical anatomy course that simulates the dental school environment
- The opportunity to interact with dental faculty.
- To enhance your credentials for the dental school admissions application (certificate included)
- We are the ONLY dental school in Texas where students learn anatomy from our collection of plastinated anatomical models. After this workshop, you'll be able to understand some important and complex structures in Head and Neck anatomy.

What is it?

The University of Texas School of Dentistry (UTSD) presents this UNIQUE opportunity for a **two-half day virtual anatomy workshop** to introduce principal fundamental concepts of the anatomical structures of the head and neck. Lecture materials provided will include a basic introduction to anatomy, muscles of the neck and facial expressions, and muscles of mastication. Participants will engage with dental faculty on the best approaches in learning head and neck anatomy. **A certificate of completion will be awarded to participants in this workshop.**

When? Two half-day virtual workshop (8am to 12pm) on Wed June 30th and Thurs July 1st, 2021

Cost? \$95 per person

Who? College students (juniors/ seniors) or graduated.

Spaces are limited and upon meeting criteria, will be granted on a first come first served basis.
